Report of the Board of Directors 2009

Operating Environment

One third of the electricity consumed in the European Union is generated by about 150 reactors at nuclear power plants in 15 member states. Most of these plants were built in the 1970s and 1980s. In recent years, there has been a renewed interest in building nuclear power plants, also in those countries which have so far not used nuclear power. There are 16 new nuclear power plant projects planned in Europe and more than 16 are being considered. Research into extending the lives of existing plants is also being conducted everywhere.

At the end of 2009, there were 436 nuclear power plant units in 30 countries all over the world, generating about 16 per cent of the global need for electricity. More than 50 new reactors are currently being built. Over the next few years, new nuclear power plant projects are likely to be launched in Asia in particular (China, India, Japan, South Korea) and in the United States as well as in Europe. Global nuclear power plant capacity is expected to grow from today's slightly less than 400 GW to about 500 GW by the year 2030.

In June 2009, the Finnish Parliament approved a Government report as Finland's long-term climate and energy strategy. According to the report, Finland's need for electricity will continue to grow after the current recession. We will need

new capacity to replace imported electricity, to reduce carbon dioxide emissions and to prepare for the projected increase in consumption. According to the strategy, Finland's energy supply should primarily be based on national capacity and cover peak consumption and any disruptions in imported supply. Building new national capacity should give priority to emission-free and lowemission power plants. The option of construction of more nuclear energy has also been taken into account in political decision-making.

In 2009, total consumption of electricity in Finland was 80.8 TWh, which was 6.5 TWh (7.4%) less than in 2008. This was a second year of decrease in electricity consumption. The reason for the decline was the economic recession, which reduced electricity consumption especially in industry. Towards the end of the year, industrial production began to pick up, which also increased industry's demand for electricity. Forest industry held its place as the largest industry using electricity with its consumption of 19.7 TWh.

In 2009, co-generation of electricity and heat accounted for nearly 30 per cent, nuclear power for 27.9 per cent, hydropower for 15.6 per cent and coal-fired and other condensation power for 11.3 per cent of the electricity used. Net import of electricity covered 15.0 per cent of the electricity consumption, which was over 5 per cent less than in the pre-

vious year. Wind power accounted for 0.3 per cent.

Main Events

TVO celebrated its fortieth anniversary on 23 January 2009. The company was originally founded to generate low-priced electricity for industry; later decades saw TVO develop into a leading provider of electricity for the whole Finland. The Olkiluoto 3 project brought along an expansion of the ownership base; today, more than fifty Finnish energy companies are involved in the project. In 2009, the two Olkiluoto units produced around 18 per cent of the electricity used in Finland.

In 2009, the Olkiluoto nuclear power plant achieved the highest production output in its operating history. The combined output of the OL1 and OL2 power plant units was 14.5 TWh (14.5 billion kilowatthours). Combined further with TVO's share in the Meri-Pori coalfired power plant, the output was 15.3 TWh.

In May, the Association for Finnish Work awarded the Key Flag, a symbol of Finnish know-how, to electricity generated by TVO's Olkiluoto nuclear power plant. As a symbol of Finnish manufacture, the Key Flag was a recognition of TVO's hard work and solid expertise.

The new outage building, the construction of which had begun in spring 2008, was completed and was taken into use in May.

In June, TVO established a 2 billion Euro Medium Term Note Programme (EMTN) listed on the Luxembourg Stock Exchange. The Company issued a EUR 750 million seven-year bond under the programme. The proceeds from the offering will be used for general corporate purposes.

Construction of the Olkiluoto 3 plant unit continued, as did equipment and component deliveries to Olkiluoto. The reactor pressure vessel, the four steam generators and the pressurizer for the nuclear island arrived at Olkiluoto, and the manufacture of the main coolant pipes in France continued. In September, the dome part, which forms the "roof" of the steel liner, was placed on top of the reactor building. The toppingout of OL3 was celebrated on 11 November 2009. At best, the workers on the site in 2009 numbered about 4,300; and as before, occupational safety remained at a high level. At the turbine island, installation progressed to the final stages.

Based on progress reports submitted by the plant supplier, TVO has estimated that the start-up of the unit may be postponed beyond June 2012, which is the current schedule informed by the Supplier. TVO commissioned the plant unit on a fixed price turnkey delivery contract, with the Supplier responsible for the time schedule.

TVO's application for the decision in principle regarding Olkiluo-

to 4 project is, according to TVO's opinion, completely ready for decision. The Ministry of Employment and the Economy has received all the statements required for handling the application and the responses thereto submitted by TVO. The favourable statement issued by the municipality of Eurajoki is legally valid. Also Posiva Oy's application for a decision in principle regarding extension of its spent fuel repository for OL4 is, according to TVO's opinion, ready for decision.

Annual outages at OL1 and OL2 were carried out according to plan between 3 and 30 May 2009.

During the year under review, 31 permanent employees were recruited (2008: 70). 23 (37) permanent employees left the company, of whom 13 (12) retired.

Financial Performance of the Group

TVO operates on the cost-price principle. The shareholders are annually charged incurred costs in the price of electricity and thus in principle the profit/loss for the financial year is zero. The shareholders pay variable costs based on the volumes of energy supplied and fixed costs in proportion to their ownership, regardless of whether they have made any use of their share of the output or not. Because of the Company's operating principle, key indicators based on financial performance will not be presented.

The consolidated turnover for the period under review was EUR 305.4 (257.3) million. The amount of electricity delivered to shareholders was 15,230 (15,144) GWh.

The Group made a loss of EUR 41.4 (53.1) million. The adjusted consolidated loss was EUR 24.4 (46.8) million (see Key Figures). The increase in revenue (EUR 50.8 million) was mainly due to the increase in charges, by which the expenses were covered.

Group's Financing and Liquidity

The Group's financial situation has developed as planned.

The Company's interest-bearing liabilities (non-current and current) totalled EUR 2,586.6 (1,959.5) million at the end of the year excluding the loan from the Finnish State Nuclear Waste Management Fund, relent to shareholders. During 2009, TVO raised a total of EUR 1,276.3 (800.7) million in non-current liabilities, while repayments amounted to EUR 621.0 (67.0) million. The loan from the Finnish State Nuclear Waste Management Fund was increased by EUR 55.1 (47.7) million. The OL3 project's share of financing costs has been capitalised in the balance sheet.

TVO uses its right to borrow funds back from the Finnish State Nuclear Waste Management Fund within the framework of legal regulations. The amount of the loan is EUR 750.9 (695.8) million and it is included in interest-bearing liabilities.

In June, TVO established a 2 billion Euro Medium Term Note Programme (EMTN), which is listed on the Luxembourg Stock Exchange. The Company issued a EUR 750 million seven-year bond under the programme. The bond carries an annual coupon of 6%. Both the bond and the programme are rated A- (stable outlook) by Fitch Ratings (Fitch). The proceeds of the offering will be used for general corporate purposes. In addition, the company issued a NOK 550 million, SEK 650 million and another SEK 600 million private placement under the EMTN Programme.

Both the Japan Credit Rating Agency (JCR) and Fitch confirmed their credit ratings for TVO at their previous levels. The JCR rating was confirmed at AA Flat in January and the Fitch long-term credit rating at A– and short-term credit rating at F2 in June. The outlook was assessed as being stable.

The Annual General Meeting on 30 March 2009 decided to raise the company share capital by EUR 100.0 million and the subscription price was paid in November.

On 30 March 2009, TVO's B series shareholders committed to provide a EUR 300.0 million subordinated shareholder's loan to TVO. The loan has not been drawn.

Share Capital and Share Issues

TVO's share capital on 31 December 2009, was EUR 461.7 (361.7) million.

The Company has 1,257,280,792 (1,162,467,100) shares, of which 680,000,000 are in the A series. These entitle holders to electricity generated at the OL1 and OL2 units. The C series consists of 34,283,730 shares, which grant entitlement to electricity generated by TVO's share of the Meri-Pori coal-fired power plant. In addition, the Company may have a maximum of 680,000,000 B-series shares granting entitlement to electricity generated at OL3.

An extraordinary Shareholders' Meeting on 30 March 2009 decided to issue shares in the B series amounting to EUR 100 million, by issuing 94,813,692 new shares. The subscription price was paid in November and the increase in share capital was recorded in the trade register in December. Following this, the total number of B series shares is 542,997,062 (448,183,370).

The increase in share capital was based on the OL3 unit's financing plan, which states that equity required by investment accrues as the project proceeds.

Corporate Governance

Because TVO is a non-listed public company applying the Mankala principle (cost-price principle), it observes the Corporate Governance Code for listed companies

where applicable. However, TVO is not obliged to observe the Corporate Governance Code nor therefore the Comply or Explain principle. According to Chapter 2, Section 6 of the Securities Market Act, the issuer of a security subject to public trading must provide a Corporate Governance Statement in its Annual Report or separately. TVO has published a separate Corporate Governance Statement on its www-pages.

Administrative Bodies

TVO's administrative bodies and their functions in 2009 have been described in a separate Corporate Governance Statement to be found on the Company's www-pages.

Regulatory Environment

One fundamental principle behind the legislation on nuclear energy is that its exploitation must be in the overall good of the society as a whole. The main rules on the use of nuclear energy, monitoring that use and nuclear safety, are contained in the Finnish Nuclear Energy Act and the Nuclear Energy Decree as well as lower level statutes pursuant to them such as the Radiation and Nuclear Safety Authority's YVL (NPP) guidelines. Other regulations pertaining to the exploitation of nuclear energy are to be found in the Radiation Act. In addition the Nuclear Liability Act concerns the liability the operator in charge of a nuclear plant has in the event of a nuclear accident.

The use of nuclear energy is subject to licence. Applications are made to the Government for decision in principle, construction license and operating licence. The Radiation and Nuclear Safety Authority is responsible for monitoring the safe use of nuclear energy and it is also responsible for monitoring safety and emergency arrangements and nuclear material.

Risk Management, Major Risks and Uncertainties

Risk Management

The purpose of risk management is to support the achievement of goals, to prevent risks from materialising, and to reduce the probability of risks and their possible effects. Risk management is supervised by the Board of Directors of the Company, which endorses the principles on which it is based.

Risk management is the responsibility of the Company's Management Group, under which there is a risk management group that controls the coordination. The risk management group maintains and develops the risk management system, undertakes company risk surveys as often and as thoroughly as necessary, analyses risks, and monitors the necessary action plans, ensuring that their scope is adequate.

The organisation units are responsible for the practical implementation of risk management. Corporate security, risk management

guidelines, reports and insurance are dealt with centrally.

At TVO, risk management is part of activity based management system that is in accordance with the Company's safety culture and a part of the daily operation. Threats to the operation, different risk factors and procedures for preventing, managing and reducing them, are constantly monitored. In risk identification processes, the likelihood of various threats becoming a reality is assessed and separate action plans are drawn up for them on a case-by-case basis.

At TVO, strategic risks are classified as follows: power plants, safety and environment, new capacity, personnel, cost-efficiency, nuclear waste management and the confidence of stakeholders. Risk assessments for annual targets are based on the organisation units' targets for the following year.

TVO reduces risks connected with safety and production by keeping the plant units in good condition. The high-quality planning and implementation of the annual outages is particularly important. The Company has also taken out nuclear and other property damage insurance policies to limit risks to property. Statutory liability insurances are valid for cases involving nuclear liability. For the Group's production of electricity, uranium and coal, as fuel, are bought on the global market. Risks connected with nuclear fuel have been reduced by making purchases from a large number of suppliers and by concluding longterm contracts.

At OL3, risk management during the construction stage is primarily a question of overseeing the work of the plant contractor according to the terms of the turnkey contract. Property damage risks and possible delays caused by them are covered by insurances.

TVO's financing and financial risk management is dealt with centrally by the company's financing unit, in accordance with the financing policy adopted by the Board of Directors. The financing risks of TVO's business include liquidity, and market and credit risks. By diversifying sources of finance, and with long-term credit commitments and liquid funds, financing risks can be reduced. TVO has reduced market risks by making use of interest rate and currency derivatives. According to Company's financing policy the loans denominated in foreign currency will be hedged to EUR until the maturity date by using derivatives. Financial risk management and fuel price risks are dealt with in the notes to the consolidated financial statements, note 29, (Financial Risk Management).

Major Risks and Uncertainties

TVO's major risks are related to the delay of OL3 project. Based on the progress reports submitted by the Supplier, TVO has estimated that the start-up of the unit may be postponed beyond June 2012, which is the current schedule informed by the Supplier. This causes additional costs and losses, for which the Company has claimed compensation from the turnkey supplier of the OL3 plant.

The instability of financial markets has increased margins for corporate loans and this will have a knock-on effect on TVO's new loans.

A large-scale annual outage at OL1 in 2010 will include replacements of the low-pressure turbines and the generator, the internal isolation valves of the main steam lines and the seawater pumps of the condenser. These replacements involve risks related to the schedule and technical solutions.

There are no major risks or uncertainties concerning electricity production at OL1, OL2 or the Meri-Pori coal-fired power plant.

Pending Court Cases and Disputes

In December 2008, TVO was informed by the International Chamber of Commerce (ICC) that the AREVA-Siemens Consortium (the Supplier) had filed a request for arbitration concerning the delay at OL3 and the ensuing costs incurred. The Supplier's monetary claim is approximately EUR 1 billion. About one half of the claimed amount relates to alleged additional cost on account of the delay. The remainder relates to

milestone payments pursuant to the OL3 Plant Contract that in TVO's opinion had not yet become payable. TVO has considered and found the claim by the Supplier to be without merit.

In April 2009, TVO submitted to ICC its answer and counterclaim due to the Supplier's request for arbitration filed with ICC in December 2008 concerning the delay at OL3 and the ensuing costs incurred. TVO's counterclaim in money is approximately EUR 1.4 billion.

TVO is also involved in another ICC arbitration proceeding under the ICC rules concerning the costs of a technically resolved issue in connection with the construction work at OL3. The amount is minor in the context of the value of the project.

Arbitration proceedings may continue for several years.

No receivables or provisions have been recorded as a result of the arbitration proceedings.

Nuclear Power

Olkiluoto 1 and Olkiluoto 2

In 2009, the Olkiluoto nuclear power plant achieved the highest production output in its operating history. The electricity production of OL1 and OL2 in 2009 was 14,452 (14,380) GWh. The total capacity factor was 96.0 (95.3)%.

The plant units operated safely and reliably during the period under review. OL1's net production was 7,296 (7,066) GWh and the capacity factor 97.0 (93.7)%. OL2's net production was 7,156 (7,314) GWh and the capacity factor 95.1 (96.9)%.

Annual Outages

The 2009 annual outages of the Olkiluoto nuclear power plant were completed on 30 May. The inspections proved the both power plant units to be in safe and reliable condition for the next operation cycle.

The short refuelling outage for OL1 lasted about eight days. Other works included, in addition to refuelling, maintenance of one of the recirculation pumps and inspections of the reactor internals and one low-pressure turbine.

The service outage at OL2 lasted about sixteen and a half days. In addition to refuelling, other major works included e.g. replacement of a cooling system valve of the shutdown reactor and inspections of two low-pressure turbines.

A new outage building was taken into use.

Besides TVO's own personnel there was a peak of about 800 external outage workers.

Olkiluoto 3

The nuclear power plant unit Olkiluoto 3 (OL3), currently under construction, was commissioned as a turnkey project from the Consortium (referred to as the Supplier) formed by AREVA NP GmbH, AREVA NP SAS and Siemens AG. Originally

commercial electricity production was scheduled to start at the end of April 2009. Based on the progress reports submitted by the Supplier, TVO has estimated that the start-up of the unit may be postponed beyond June 2012, which is the current schedule informed by the Supplier. TVO commissioned the plant unit on a fixed price turnkey delivery contract, with the Supplier responsible for the time schedule.

The design of OL3 continued, as did also the regulatory review of documents, the construction work and the manufacturing and installation of equipment. The dome part, or the roof, of the steel liner that ensures the gas-tightness of the containment building was lifted into place. Equipment and component deliveries to Olkiluoto continued. The main equipment of the nuclear island (reactor pressure vessel, pressurizer, and four steam generators), for example, were delivered to Olkiluoto. The manufacture of the reactor coolant pipes continued in France.

Installations reached their final stage in the turbine island.

The arbitration proceedings initiated in 2008 concerning the delay of the plant unit and the costs resulting from the delay as well as the cost of a technically resolved issue connected with construction work continued. The arbitration proceedings may continue for several years.

The workforce at the site by the

end of the year was about 4,000. The safety level at the site remained good.

All the realised costs of the OL3 project that can be recognized in the cost of the asset have been entered as property, plant and equipment in the Group balance sheet.

Olkiluoto 4 Project

In spring 2008, TVO submitted an application to the Finnish Government for a decision in principle for the construction of a fourth nuclear power plant unit (OL4) at Olkiluoto.

The Ministry of Employment and the Economy (TEM) has received all the statements necessary for the handling of the application. TVO has filed with TEM its answer regarding the statements. The statement by the Eurajoki municipality is legally valid. TVO's application for the decision in principle is, according to TVO's opinion completely ready for decision.

Feasibility studies with plant suppliers continued. The studies have been extended from safety and licensing to constructability, project implementation and power plant engineering.

According to the preliminary safety assessment of STUK, the Radiation and Nuclear Safety Authority in Finland, regarding the OL4 project, all the plant alternatives presented by TVO are feasible and TVO has the capabilities to realise the project according to high safety and

quality culture. The Finnish government and parliament are expected to handle TVO's application for a decision in principle in 2010.

Nuclear Fuel

During 2009, nuclear fuel purchases amounted to EUR 45.9 (48.5) million and the amount consumed to EUR 40.1 (38.2) million.

The nuclear fuel and uranium stock carrying value on 31 December 2009 was EUR 162.8 (157.0) million, of which the value of the fuel in the reactors was EUR 61.9 (60.8) million.

Nuclear Waste Management

Under the Finnish Nuclear Energy Act, the Company is responsible for any measures related to nuclear waste management and the related costs. The Group's balance sheet includes a provision related to nuclear waste management obligations, which is based on measures expected to be taken in nuclear waste management and their costs, taking into account measures already carried out. The fair value of the provision has been determined by discounting future cash flows to the present time. In the consolidated financial statements. the liabilities show a nuclear waste management liability of EUR 633.5 (599.8) million, calculated according to international IFRS accounting principles. A corresponding amount, under assets, represents the Company's share in the Finnish State Nuclear Waste Management Fund.

In order to cover the costs of future nuclear waste management, the Company makes contributions to the Finnish State Nuclear Waste Management Fund, under the Nuclear Energy Act. The Ministry of Employment and the Economy has set TVO's liability for nuclear waste management at EUR 1,160.7 (1,137.6) million to the end of 2009 and the Company's target reserve in the Fund for 2010 at EUR 1,069.8 (1,001.2) million. The difference is covered by guarantees.

A total of 6,405 (6,238) m³ of low and medium-level radioactive waste has accumulated from the OL1 and OL2 plant units during their operation, of which 167 (114) m³ was produced in 2009. The waste is disposed of in the repository for low and medium-level waste (the VLJ repository) at Olkiluoto.

The total amount of spent nuclear fuel by the end of the year was 1,217 (1,180) tonnes, of which 37 (38) tonnes accumulated during 2009. Most of the spent fuel is kept in a separate interim storage facility at Olkiluoto (KPA storage facility).

Posiva Oy, TVO's joint venture company, is responsible for the disposal of spent nuclear fuel on behalf of its shareholders, TVO and Fortum Power and Heat Oy. The construction work for the ONKALO research facility, which is part of the project for the final disposal repository, continued at Olkiluoto.

The spent fuel generated by OL1, OL2, Loviisa 1, Loviisa 2 and OL3 will be disposed of in the Olkiluoto disposal facility. TVO accounts for about 74 per cent of the waste and contributes the same amount to the disposal costs.

Coal Power

Meri-Pori

The amount of electricity produced by TVO's share at Meri-Pori coal-fired power plant was 845.3 (816.9) GWh requiring 299.3 (286.8) thousand tons of coal and 692.0 (661.0) thousand tons of carbon dioxide emission rights.

The company's share of the free emission rights for the Meri-Pori coal-fired power plant totalled 1,479.7 thousand tons in 2008–2012. In 2009 the share was 295.9 (295.9) thousand tons.

Fortum and TVO started cooperation with Maersk Oil and Maersk Tankers with the aim to develop a large-scale pilot plant for the recovery and storage of carbon dioxide (CCS).

Research and Development

Research and development costs were EUR 21.2 (20.6) million, most of which was spent on nuclear waste management.

TVO is, through the Finnish State Nuclear Waste Management Fund, a major financier of Finnish public sector research programmes for reactor safety and nuclear waste management. In 2009, TVO's contribution to such programmes amounted to EUR 3.1 (2.9) million.

Acquisitions of Tangible and Intangible Assets and Shares

Group's investments during 2009 were EUR 844.8 (609.6) million. Investments of the parent company were EUR 802.7 (600.3) million, of which EUR 749.5 (537.0) million was allocated to the OL3 project.

Preparations for a project to replace the low-pressure turbines and generators in the OL1 and OL2 plant units scheduled for 2010 and 2011 continued.

The new outage building, the construction of which had begun in spring 2008, was completed and taken into use in May. The building is equipped with double monitoring, which means that anyone leaving the plant unit has to be screened by two different personnel monitors. This ensures more efficiently that no radioactive contamination spreads outside the power plant.

The carbon dioxide emission rights relinquished to the Energy Market Authority valued at EUR 10.6 (0.1) million. Carbon dioxide emission rights and certified emission reductions were acquired in 2009, costing EUR 6.2 (10.7) million. The need of carbon dioxide emission rights of the Company for the period under review will be covered by the acquired and free emission rights.

Safety and Environmental Issues

The Olkiluoto nuclear power plant units operated safely during the year. No incidents with a major impact on nuclear safety occurred. In 2009, six special reports were prepared for The Finnish Radiation and Nuclear Safety Authority (STUK). Three of the incidents were rated as 1, exceptional incidents affecting safety on the international INES scale (0–7). Two incidents were rated 0 (no significance for nuclear or radiation safety). One incident was not rated by INES scale because it was out of scale.

TVO's operations have been in accordance with the Company's environmental policy, environmental permits and environmental management system. Its environmental management system, which also covers the construction phase of the OL3 unit, complies with the international ISO 14001:2004 standard and is EMAS registered.

Six of the seven environmental targets set for 2009 were achieved. There were no significant environmental deviations during the year. The environmental impacts of the Olkiluoto nuclear power plant were minor. As in previous years, radioactive emissions to the atmosphere and water were extremely low, and significantly lower than the limits set by the authorities.

In September 2009, the Supreme Administrative Court gave a decision on the environmental permit for Olkiluoto nuclear power plant units OL1, OL2 and OL3. The permit became valid due to the decision.

The closure of the decommissioned landfill was carried out in accordance with environmental permit regulations during 2009.

A Corporate Social Responsibility Report will give more detailed information on the environmental issues and indicators for 2009. The report will be verified by an outside body.

Personnel and Training

Personnel

At the year-end, the total number of personnel in the Group was 802 (783), and the average during the year was 835 (812). The year-end total number of personnel in the Company was 797 (777), and the average during the year was 830 (806). The year-end total for permanent personnel was 717 (709).

TVO recruited 31 (70) employees in 2009. During the year, 28 (34) employees changed jobs and 23 (37) permanent employees left, including 13 (12) who retired.

The collective agreements, for different groups of personnel in the energy industry, remained in force the whole year.

The following appointments have been made in the Group Management: Anna Lehtiranta has been appointed as Senior Vice President, Corporate Relations and Anneli Nikula as Senior Adviser as of 11 May 2009. Risto Siilos was appointed

as Senior Vice President, Corporate Resources to succeed Reijo Sundell and Olli-Pekka Luhta as Manager, OL4 Project as of 1 July 2009. Reijo Sundell was appointed as President, Posiva Oy. Rauno Mokka, TVO's Deputy Managing Director retired on 30 September 2009.

Training

Basic and supplementary training for TVO personnel continued as in earlier years. In total, the personnel was trained 9008 (8869) days, which is 12.5 (12.7) days per each TVO employee on the average.

Operators of OL1 and OL2 units took part in supplementary training in 2009 as required by the authorities. The training of new operators proceeded as planned.

The training of OL3 operation personnel proceeded according to plan

During the year, altogether 3,997 (by 8 January 2010) (in 2008: 4, 839) people took part in induction training required from all those working at the Olkiluoto nuclear power plant area. Training was given in Finnish and English.

Subsidiaries and Joint Ventures

TVO Nuclear Services Oy (TVONS) is a wholly owned subsidiary of TVO. It delivers to its customers expertise and services based on a high level of nuclear safety, cost-effective operations and nuclear waste

management. TVONS provides its customers with access to the special expertise of TVO personnel and the Olkiluoto infrastructure.

Olkiluodon Vesi Oy is a wholly owned subsidiary of TVO. It is responsible for the raw water supply for TVO's and Posiva Oy's operations at Olkiluoto.

Posiva Oy, which is jointly owned by TVO and Fortum Power and Heat Oy, is responsible for research into and implementing the final disposal, of its shareholders' spent nuclear fuel. TVO owns 60 per cent of Posiva. Posiva continued the excavation work on the underground research facility for final disposal as planned.

Major Events after the End of the Year

No major events have taken place after the end of the year in review.

Prospects for the Future

Production is expected to continue as in earlier years. The prerequisites for nuclear power production at Olkiluoto are good. Nuclear fuel availability is guaranteed by longterm agreements.

In 2010 a longer than usual service and refuelling outage will be carried out in OL1 when new low-pressure turbines and generator will be installed in the plant unit. OL2 will have a normal refuelling outage. The outages are expected to take some 35 days.

TVO will continue to realise the OL3 nuclear power plant project and prepare the plant unit for production use as planned.

TVO will continue the preparations for the OL4 nuclear power plant project and feasibility studies of alternatives in 2010.

TVO will use its capacity at the Meri-Pori coal-fired power plant on the same basis as before.

The recruitment and training of OL3 and other plant personnel will continue as planned.

Posiva Oy will continue the construction of the underground research facility at Olkiluoto and preparation of the building permit application. The building permit will be filed with the Ministry of Employment and the Economy during 2012 as planned.

TVONS will continue to market and sell services.

Proposals to the Annual General Meeting

Teollisuuden Voima Oyj's distributable equity as of 31 December 2009 amounted to EUR 9,360.000. The Board of Directors proposes to the Shareholders' Meeting that no dividend shall be paid.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 GENERAL INFORMATION ON THE GROUP

Teollisuuden Voima Oyj together with its subsidiaries forms the TVO Group. The ultimate parent of the Group is Teollisuuden Voima Oyj, domiciled in Helsinki.

Teollisuuden Voima Oyj is a public limited liability company owned by Finnish industrial and power companies. In accordance with its Articles of Association, TVO delivers electricity to its shareholders under the so-called Mankala principle (at cost price), i.e. delivers the electricity produced or procured to its shareholders in proportion to their shareholdings in each series. Each of the shareholders of the each series is liable for variable and fixed annual costs that are specified in detail in the Articles of Association. The Company owns and operates two nuclear power plant units (OL1 and OL2) in Olkiluoto in the municipality of Eurajoki and is having a third unit (OL3) constructed. In addition to the nuclear power plant in Olkiluoto, TVO has a share in the Meri-Pori coal-fired power plant and in a gas turbine plant and owns a wind power plant in Olkiluoto.

Copies of the consolidated financial statements are available at the internet address www.tvo.fi and at the TVO Helsinki office at the address Töölönkatu 4, 00100 Helsinki.

These consolidated financial statements were authorised for issue by the Board of Directors of TVO in its meeting on 19 February 2010. Under the Finnish Limited Liability Companies Act the Shareholders' meeting may modify or reject the financial statements.

2 ACCOUNTING POLICIES

BASIS OF PREPARATION

These consolidated financial statements of TVO Group have been prepared in accordance with International Financial Reporting Standards (IFRS). These financial statements have been prepared in accordance with the IAS and IFRS standards and SIC and IFRIC interpretations effective at 31 December 2009. In the Finnish Accounting Act and regulations issued by virtue of it, "IFRS" refers to the standards and interpretations which have been endorsed by the EU in accordance with the procedure defined in the EU Regulation (EY) No. 1606/2002.

The consolidated financial statements have been prepared under the historical cost convention, except for fund units and investments in shares and derivative financial instruments, which are recognised at fair value.

The consolidated financial statements are presented in euros, which is the functional and presentation currency of the Group's parent company.

The consolidated financial statements have been prepared according to the same accounting policies as in 2008 except the following new standards, interpretations and changes of standards on 1 January 2009.

- IAS 1 (Revised) Presentation of financial statements. The Group presents Consolidated Statement of Comprehensive Income and has changed the presentation of consolidated statement of changes in equity.
- IAS 23 (Revised) Borrowing costs Revised IAS 23 changes the accounting policy in respect of borrowing costs relating to qualifying assets for which the commencement date for capitalisation is on or after 1 January 2009. The borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset shall be capitalised as part of the cost of that asset. Previously TVO recognised as an expense immediately all borrowing costs expect the borrowing costs of the power plant construction in progress.

- IFRS 8 Operating Segments. According to the new standard segment information is based on reports for the chief operation decision maker. This has added the numbers of reported segments to two: Nuclear power and Coal-fired power.
- IFRS 7 (Change) Financial Instruments: information presented in the financial statements. The change in accounting policy only results in additional disclosures the in consolidated financial statements.
- The annual improvements to IFRS standards. The impacts of the improvements varies with standards. Changes have not had significant relevance in the consolidated financial statements.

The following standards issued during the year 2009 have no impact in the consolidated financial statements

- IFRIC 11, IFRS 2 -Group and treasury share transactions.
- IFRIC 13 Customer Loyalty Programmes
- IFRIC 14, IAS 19 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction
- IFRS 2 (Amendment) Share-based payment vesting conditions and cancellations
- IAS 1 and IAS 32 (Amendment) Financial Instruments Puttable at Fair Value and Obligations Arising on Liquidation
- IFRS 1 and IAS 27 (Amendments) Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate in Adoption of IFRS
- IAS 39 (Amendment) Financial instruments: Recognition and measurement Eligible Hedged Items

In addition to the new standards and interpretations presented in the annual financial statements for 2008, the following standards and interpretations and amendments to existing standards and interpretations issued during the year 2009 will be adopted by the group in 2010. These changes have been considered to have no significant impact on the consolidated financial statements.

- IFRIC 9 and IAS 39 (Amendment)* Reassessment of embedded derivatives on reclassification.
- IFRIC 18* Transfers of Assets from Customers
- IFRS 2 (Amendment)* Share-based Payment Group Cash-settled Share-based Payment Transactions
- The Improvements to IFRS standards*

The following standards, interpretations and amendments will be adopted by the Group in 2011 or later:

- IAS 32 (Amendment) Financial Instruments: Presentation Classification of Rights Issues
- IAS 24 (Revised) * Related Party Disclosures
- IFRIC 19 * Extinguishing Financial Liabilities with Equity Instruments
- IFRIC 14 (Amendment)* Prepayments of a Minimum Funding Requirement
- IFRS 9 * Financial Assets Classification and Measurement.
- * The standard, interpretation or amendment to published standard or interpretation is still subject to endorsement by the European Union.

COMPANIES INCLUDED IN THE CONSOLIDATED FINANCIAL STATEMENT Subsidiaries

The consolidated financial statements include Teollisuuden Voima Oyj (TVO) and its subsidiaries TVO Nuclear Services Oy, Olkiluodon Vesi Oy and Perusvoima Oy. Subsidiaries are companies in which the Group has control at the end of the financial period. Control exists if the Group holds more than a half of the voting rights or otherwise has control. Subsidiaries acquired are consolidated from the date on which control is transferred to the Group, and subsidiaries sold are no longer consolidated from the date that control ceases.

The purchase method of accounting is used to consolidate subsidiaries into the Group. The purchase price is determined as the aggregate of the acquisition date fair values of the assets given as consideration and liabilities incurred or assumed plus costs directly attributable to the acquisition.

In the consolidation process, inter-company share ownership, inter-company transactions, receivables, liabilities, unrealised gains and internal distributions of profits are eliminated. Unrealised losses are not eliminated, if the losses are due to impairment of the asset being transferred. To ensure consistency, subsidiaries' accounting policies have, in all material respects, been changed to conform to the accounting policies adopted by the Group.

Associated companies and joint ventures

Associated companies are entities over which the Group has significant influence. Significant influence is established when the Group holds over 20% of the voting rights of the entity or otherwise has significant influence, but not control. TVO has no associated companies. TVO's associated company Polartest Oy was sold in 2008.

Joint ventures are entities over which the Group has contractually agreed to share the power to govern the financial and operating policies of that entity with another venturer or venturers. Posiva Oy is a joint venture of TVO, which has a 60% interest in it. Both venturers are liable for its main activities, waste management of spent fuel of nuclear power plants, in proportion to their own usage.

Interests in associated companies and joint ventures are accounted for by the equity method of accounting.

SEGMENT REPORTING

TVO Group has adopted IFRS 8 Operating Segment -standard as of 1 January 2009. The Board of Directors is the chief operation decision maker. The Group has two reportable segments; nuclear power and coal-fired power.

REVENUE RECOGNITION PRINCIPLES

TVO operates on the cost-price principle. Revenue is recognised based on the consideration received when electricity is delivered or services are rendered. Revenue is presented net of indirect sales taxes. Revenue is recognised as follows:

Sales of electricity and other revenue

Revenue on sales of electricity is recognised based on delivery. The recognised income for shareholders is based on the quantities delivered. The revenue from services is recognised on an accrual basis on the accounting period when the services are rendered to the customer.

Revenue on long-term consulting services projects that spread over several accounting periods is recognised based on the proportion of costs incurred from work performed up to the balance sheet date and the estimated total expenses of the project. If it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Other income

Revenue from activities outside the ordinary course of business is reported as other income. This includes rental income and non-recurring items, such as gains from sales of property, plant and equipment. The accrual basis of accounting is applied in the recognition of this income.

GOVERNMENT GRANTS

Grants are recognised at their fair value, when the Group meets all the conditions attached to them and where there is a reasonable assurance that the grant will be received. Government grants relating to costs are

deferred on the balance sheet and recognised in the income statement over the period in which their relevant costs are recorded. Government grants relating to the purchase of property, plant and equipment are deducted from the acquisition cost of the asset.

RESEARCH AND DEVELOPMENT COSTS

Research and development costs (except R&D costs related to nuclear waste management) of the Group are recognised as an expense as incurred and included in other expenses in the income statement. Development costs are capitalised if it is assured that they will generate future income, in which case they are capitalised as intangible assets and amortised over the period of the income streams. Currently the Group does not have any development costs that would qualify for capitalisation.

Research costs that relate to nuclear waste management are discussed in paragraph Assets and provisions related to nuclear waste management obligations.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment of the Group are stated on the consolidated balance sheet at historical cost less grants received, accumulated depreciation and impairment charges, if any. Historical cost includes expenditure that is directly attributable to the acquisition of an item.

In the historical costs of power plant projects and other significant investments (completion time more than a year) the financing costs incurred during the construction period will be included.

The historical costs of nuclear power plants include furthermore the estimated costs of dismantling and removing an item and restoring the site on which it is located (more information is included in paragraph Assets and provisions related to nuclear waste management obligations).

Land and water areas are not depreciated.

Other property, plant and equipment are depreciated using the straight-line method over their estimated useful lives.

Straight-line depreciation is based on the following estimated useful lives:

OL1 and OL2 nuclear power plant units

| • | Basic investment | 61 years |
|---|---|-------------|
| • | Investments made according to the modernization programme | 21–35 years |
| • | Automation investments associated with the modernization | 15 years |
| • | Additional investments | 10 years |
| • | TVO's share in the Meri-Pori coal-fired power plant | 25 years |
| • | Wind power plant | 10 years |
| • | TVO's share in the Olkiluoto gas turbine power plant | 30 years. |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate to reflect the changes in expectations of economic benefits.

Costs of renewal of an item or a part of an item of property, plant and equipment are capitalised if the part is accounted for as a separate item. Otherwise, the subsequent expenditure is included in the carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group.

Annual repair and maintenance costs are recognised in profit or loss, when they occur. Investments connected with the modernization and maintenance of the power plant units are capitalised.

OL3 is nuclear power plant unit under construction. All items related to OL3 project are shown as incomplete plant investment (see note 12).

INTANGIBLE ASSETS

Intangible assets are stated at historical cost less grants received accumulated amortisation and impairment losses if applicable. Historical cost includes costs directly attributable to the acquisition of the particular asset

Other long-term expenditure included in intangible assets are amortised on a straight-line basis over their estimated useful lives. These include computer software and certain payments made for the use of assets. The Group does not have any goodwill or other intangible assets with indefinite useful lives.

The amortisation periods of the intangible assets are as follows:

Computer software
 Other intangible assets
 10 years
 10 years

The amortisation period of an intangible asset is changed where necessary if the estimated useful life changes from that previously estimated.

Furthermore, intangible assets include carbon dioxide (CO₂) emission rights. Emission rights are recognised at historical cost, and are presented under emission rights. Gratuitous emission rights are assets not included in the balance sheet. The current liability for returning emission rights is recognised at the carrying value of possessed emission rights. If there is a shortfall, a current liability is recognised to cover the acquisition of the missing emission rights. This current liability is valued at the current market value of the emission rights at the balance sheet date. The cost of the emission rights is recognised in the income statement under costs of materials and services. The gains from the sales of emission rights are refunded to the equity holders of the company.

IMPAIRMENT OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

At the balance sheet date it is reviewed whether there is any indication that the carrying amounts of assets would be impaired. When the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognised in the income statement. A recognised impairment loss is reversed if there is a change in estimates used to determine the recoverable amount of the asset. However, the carrying amount of the asset after the reversal shall not exceed the carrying amount that would have been determined had no impairment loss been recognised.

INVENTORIES

Inventories are measured at acquisition cost. The cost of coal is determined by using the FIFO (first in, first out) method and the cost of supplies is determined by using the rolling weighted average cost formula. The use of nuclear fuel is recognised according to calculated consumption.

The acquisition cost comprises raw materials, direct labour and other direct costs. The carrying amount of inventories is not reduced to a value that is less than its acquisition cost, as TVO operates at cost price, so the net realisable value of inventories always covers their acquisition cost.

LEASES

Finance leases

Leases that transfer to the Group substantially all the risks and rewards incidental to ownership are classified as finance leases. Assets acquired under finance leases are recognised in the balance sheet at the commencement of the lease term at the fair value of the leased asset or, if lower, the present value of the

minimum lease payments. Leased assets are depreciated over the shorter of the useful life of the asset and the lease term. Lease obligations are recognised under interest-bearing liabilities.

Lease payments are apportioned during the lease term between the finance charge and the reduction of the outstanding liability to produce a constant periodic rate of interest on the remaining balance of the liability.

Other leases

Lease payments under other leases are recognised in the income statement as an expense under the accrual principle on a straight-line basis over the lease term.

Lease payments received are recognised as income on a straight line basis over the lease term and presented in the income statement under other income.

FINANCIAL ASSETS

The Group has classified its financial assets into four categories as following: Derivative financial instruments at fair value through profit or loss, loans and receivables, available-for-sale investments, and derivative financial instruments designated as cash flow hedges. The classification is based on the purpose of the acquisition of the assets, and the assets are classified at initial acquisition.

All purchases and sales of financial assets are recognised at fair value on the trading date including related transaction costs, except for items that are measured at fair value through profit or loss.

Financial assets are derecognised when the contractual rights to the cash flows of the investment expire or have been transferred or the Group has substantially transferred all the risks and benefits of ownership.

Derivative financial instruments at fair value through profit or loss

Derivative financial instruments at fair value through profit or loss do not meet the criteria for hedge accounting according to IAS 39 and they are presented as current assets. Gains and losses from changes in fair value are recognised in the income statement in the period in which they arise, except when they relate to the construction of OL 3 power plant and are capitalised as part of the cost of the asset.

Loans and receivables

Loans and receivables include non-current loans and receivables as well as current trade and other receivables. Items due to be settled after more than 12 months are recognised in non-current assets. After initial recognition, all loans and receivables are measured at amortised cost using the effective interest method. Trade receivables are recognised on the balance sheet at their original nominal value, which reflects their fair value.

Available-for-sale investments

Available-for-sale investments include investments in shares and fund units. Items due to be settled after more than 12 months are recognised in non-current assets. Available-for-sale investments are measured at fair value, and the changes in fair value are recognised in the fair value reserve under equity. The changes in fair value are transferred from equity to the income statement when the investment is sold or when it is impaired so that an impairment loss needs to be recognised. Investments in unquoted shares whose fair value cannot be reliably determined are measured at acquisition cost.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, demand deposits and other current, highly liquid investments. Assets classified as cash and cash equivalents have a maturity of three months or less from the date of acquisition.

Impairment of financial assets

At each balance sheet date, the Group estimates whether there is any objective evidence that a financial asset or group of financial assets is impaired. If any evidence exists of the impairment of a financial asset or group of financial assets classified as available-for-sale, any loss accumulated in the fair value reserve is transferred into profit or loss. Impairment losses on equity investments classified as available-for-sale are not reversed through profit or loss, whereas subsequent reversals of impairment losses on interest-bearing instruments are recognised in profit or loss. The Group recognises an impairment loss on trade receivables when there is objective evidence that the receivable is not fully collectible.

FINANCE LIABILITIES

Financial liabilities are initially recognised at fair value including related transaction costs. After initial recognition, all finance liabilities are measured at amortised cost using the effective interest method. Finance liabilities include non-current and current liabilities, and they can be interest-bearing or non-interest-bearing. An item is included in current liabilities if it is due to be settled within 12 months. Finance liabilities also include derivative financial instruments which are discussed in a separate section.

DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGE ACCOUNTING

The Group uses derivative financial instruments as hedges of the currency risk relating to purchases of fuel and of the interest rate risk of loans. Hedge accounting referred to in IAS 39 is applied to instruments entered into for the purpose of hedging of the currency risk of the Group's firm commitments for purchases of uranium and coal (forward foreign exchange contracts) and to most of the interest rate swaps entered into for the purpose of hedging against the fluctuations in the interest cash flows relating to the loan contracts of the Group.

The derivative financial instruments are initially recognised at fair value on the date when the Group becomes a party to a derivative contract, and subsequently measured at fair value on the balance sheet date. The changes in the fair value of interest rate options (such as interest rate cap and floor) as well as of some interest rate swaps and forward foreign exchange contracts that do not qualify for hedge accounting are presented under finance income and expenses, unless they relate to the construction of OL 3 power plant and are capitalised as part of the cost of the asset.

Cash flow hedge accounting

Both at the inception of a hedge and thereafter, the Group documents its estimate on whether the derivative financial instruments used in the hedge transactions are highly effective in offsetting changes in the cash flows of the hedged items. The derivative financial instruments to which hedge accounting is applied are classified as non-current and current assets and liabilities on the basis of the timing of the cash flows of the hedging instrument in question.

The effective portion of the changes in the fair values of derivatives designated as and qualifying for cash flow hedges is recognised in equity. The gain or loss relating to the ineffective portion is recognised in profit or loss, except when they relate to the construction of OL 3 and are capitalised as part of the cost of the asset. The fair value changes accumulated in equity are recognised in profit or loss in the same period when the hedged item affects profit or loss. However, when the hedged anticipated transaction results in the recognition of a non-financial asset or non-financial liability, the gains and losses recognised in equity are removed from equity and included in the initial carrying amount of the asset or liability.

When a hedge no longer qualifies for hedge accounting, the cumulative gains or losses currently included in equity are recognised in profit or loss during the lifetime of the hedging instrument in question. When the hedging instrument initially recognised as a cash flow hedge matures or is sold, the cumulative gains or losses currently included in equity are recognised in profit or loss.

When an anticipated transaction is no longer expected to occur, the cumulative gain or loss included in equity is recognised in profit or loss. Gains and losses from hedges related to fuel purchases are recognised to adjust the fuel purchases under the Materials and services item.

BORROWING COSTS

Borrowing costs are recognised in profit or loss in the period when they have incurred, except when they relate to the construction of a power plant or any other investment, of which completion time exceeds one year. In that case, borrowing costs are capitalised as part of the cost of the asset. Such borrowing costs include, for example, interest and other financing costs incurred during construction of a power plant.

FOREIGN CURRENCY ITEMS

Transactions and financial items denominated in a foreign currency are recorded at the rates on the day when they occur. Receivables and liabilities denominated in a foreign currency are measured in the financial statements at an average rate on the date of the balance sheet. Exchange gains and losses from operating activities are included in the corresponding items above operating profit or loss. Exchange differences arising from financial items are recognised in finance income and expenses.

SHARE CAPITAL

TVO has in its possession three series of shares, A, B and C. The A series entitles the shareholder to the electricity generated by the existing OL1 and OL2 nuclear power plant units. The B series entitles the shareholder to the electricity that will be generated by the OL3 unit. The C series entitles the shareholder to the electricity generated by the TVO share in the Meri-Pori coal-fired power plant.

Payments received from shares in connection with setting up the TVO and in the form of increases in share capital are recognised under share capital, statutory reserve and share premium reserve.

EARNINGS PER SHARE

The group does not report earnings per share, as the parent company is operating at cost price. The shares of TVO are not traded on a public market.

PROVISIONS

The Group recognises a provision for environmental restorations, asset retirement obligations, as well as legal and other claims, when the Group has a legal or constructive obligation and it is likely that an outflow of resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. The provision is measured at the present value of the expenditure expected to be required to settle the obligation. The interest rate used in the measurement of provisions is the estimated long-term borrowing rate plus the ECP's inflation target and an estimated company-specific risk premium. The increase in the provision due to the passage of time is recognised as interest expense.

The most significant provision is that for the nuclear waste management obligation under the Nuclear Energy Act. The provision covers all future expenditure arising from nuclear waste management, including the decommissioning of nuclear power plants, the disposal of spent fuel and a risk marginal.

Assets and provisions related to the nuclear waste management obligation

The parent company's nuclear waste management obligation which is based on the Nuclear Energy Act is covered by payments made to the Finnish State Nuclear Waste Management Fund. The obligation covers all the future expenditures for nuclear waste management, including the decommissioning of nuclear power plants, the disposal of spent fuel, and a risk marginal. The amount of payments is determined by assuming that the decommissioning would start at the beginning of each year. The research relating to the disposal, as well as the actual disposal of TVO's spent fuel, are carried out by Posiva Oy, which charges from TVO the costs arising from these activities, including the acquisition cost of property, plant and equipment.

In the consolidated financial statements, TVO's share of the Finnish State Nuclear Waste Management Fund is shown as non-current assets and the related nuclear waste management obligation as a provision under

non-current liabilities. They are accounted for in accordance with IFRIC 5 Rights to Interests Arising from Decommissioning, Restoration and Environmental Rehabilitation Funds.

The fair value of the nuclear waste management provision has been determined by discounting the future cash flows which are based on plans about future activity and the estimated expenditure relating to it, taking into account actions already taken.

The present initial value of the provision for the decommissioning of a nuclear power plant (at the time of commissioning the nuclear power plant) has been capitalised as property, plant and equipment and will be adjusted later for possible changes in the plan. The amount recognised relating to decommissioning will be depreciated over the estimated operating time of the nuclear power plant.

The provision for spent fuel covers the future disposal costs of fuel used by the end of each accounting period. The costs for the disposal are expensed during the operating time of the plant, based on fuel usage. The impact of any changes to the plan will be recognised immediately in the income statement based on fuel used by the end of the accounting period.

The timing factor is taken into account by recognising the interest expense related to discounting the nuclear waste management provision. The interest accruing on TVO's share in the Finnish State Nuclear Waste Management Fund is presented as finance income.

TVO's share in the Finnish State Nuclear Waste Management Fund is higher than the corresponding asset recognised in the balance sheet. The nuclear waste management obligation is covered by TVO's share in the Fund, as required by the Nuclear Energy Act. The obligation for nuclear waste management is not discounted. The amount of the annual payment to the Finnish State Nuclear Waste Management Fund is based on the change on the nuclear waste management obligation and funding obligation target, the share of the profit or loss of the Fund, and the changes resulting from actions taken.

TAXES

The Group does not recognise deferred taxes, because TVO operates at cost price. According to this principle, TVO will not pay taxes on its operations, and therefore there is no taxable income. The tax recognised by the Group consists of tax relating to non-deductible expenses. It also includes any taxes for previous financial year.

EMPLOYEE BENEFITS

The pension benefits for Group personnel have been arranged with external pension insurance companies. The insurance policies relating to earnings-based pensions, as well as some voluntary pension insurance policies, have been accounted for as defined contribution plans.

Payments made to defined contribution plans as to pensions are recognised on an accrual basis in the income statement.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires estimates and assumptions concerning the future. Estimates and assumptions have an effect on the reported amounts of assets and liabilities, and expenses and income during the accounting period. The actual results may differ from these estimates.

The provision for future obligations for the decommissioning of the nuclear power plant and for the disposal of spent fuel

Estimates and assumptions have been used when estimating the assets, liabilities, expenses and income related to the future decommissioning of the nuclear power plant and the disposal of spent fuel. These are based on long-term cash-flow forecasts of estimated future costs.

The main assumptions relate to technical plans, time factor, cost estimates and the discount rate. The technical plans are approved by State authorities. Any changes in the assumed discount rate would change the provision. If the discount rate used were lowered, the provision would increase.

TVO's contributions to the Finnish State Nuclear Waste Management Fund are based on undiscounted legal liability. Any future increase in the provision would be offset by the recognition of an equal increase in TVO's share in the assets of the Finnish State Nuclear Waste Management Fund. According to IFRS, the carrying amount of the assets is limited to the value of the provision, as TVO does not have control in the Finnish State Nuclear Waste Management Fund (see note 25 Assets and provisions related to nuclear waste management obligation).

Power plant construction in progress - OL3

OL3 is a power plant unit under construction that has been ordered under a turnkey principle. According to an announcement of the OL3 turnkey supplier, the delivery will be delayed from the original schedule according to which the power plant unit should have been in production as of 30 April 2009. In compliance with the supply contract the company is entitled to compensation in case the delay is due to the supplier. Additionally, because of the delay the company has incurred and will incur direct and indirect expenses for which the company on the basis of the supply contract has claimed for compensation. In its Financial Statement the company handles liquidated damages and compensation receivables and the supplier's claims related to the plant supply as one entity Claims between the parties will finally be settled in arbitration. Since the financial result of the arbitration procedure currently in progress cannot be reliably estimated, no receivables or liabilities as required, by IAS 37, have been booked.

No reserves have been booked for the supplier's claims and arbitration procedures as the claims have been considered and found to be groundless.

All the realised costs on the OL3 project that can be recognised in cost of the asset have been booked as property, plant and equipment on the Group balance sheet.

3 SEGMENT REPORTING

Segment structure in TVO Group

The Group has two reportable segments; nuclear power and coal-fired power.

The electricity of the nuclear power segment is produced at two nuclear power plant units, Olkiluoto 1 and Olkiluoto 2 (OL1 and OL2). A new unit, Olkiluoto 3 (OL3), is under construction at Olkiluoto. The subsidiaries of TVO, TVO Nuclear Services Oy (TVONS), Olkiluodon Vesi Oy and Perusvoima Oy, of which operation is related to nuclear power, are also included in the nuclear power segment.

The electricity of coal-fired power segment is produced by TVO share at the Meri-Pori coal-fired power plant.

Segment calculation principles

TVO Group discloses in the segment information; turnover, profit/loss for the year and assets, which the chief operation decision maker follows.

The chief operation decision maker follows reporting according to Finnish Accounting Standards (FAS). Adjustments made under IFRS accounting policies will be followed in group level.

Information about geographical areas

Teollisuuden Voima Oyj is company owned by Finnish industrial and power companies. TVO delivers electricity to its shareholders under the so-called Mankala principle (at cost price), i.e. delivers the electricity produced to its shareholders in proportion to their shareholdings in each series.

The Group assets are located in Finland except part of inventories of nuclear fuel acquisition.

4 WORK PERFORMED FOR OWN PURPOSE

TVO has a 60% shareholding in Posiva Oy. Posiva is responsible for the research and implementation of final disposal of spent nuclear fuel of its shareholders TVO and Fortum Power and Heat Oy (FPH). In the consolidated financial statements Posiva is accounted by the equity method of accounting.

TVO governs Posiva Oy jointly with FPH, based on Articles of Association and Shareholders Agreement. TVO is liable for approximately 74% of Posiva's expenses. The duty of Posiva is to carry out all tasks related to the final disposal of spent nuclear fuel of its shareholder's nuclear power plants in Finland in order to fulfill their nuclear waste management obligation as specified in the Nuclear Energy Act. The company's operations also include research and construction related to the final disposal solution. Management of spent fuel is carried out according to the detailed plan examined by Finnish Centre for Radiation and Nuclear Safety and approved by The Ministry of Employment and the Economy.

Fair value estimation

The book values of the floating interest rate loan receivables and other receivables are measured at amortized cost using the effective interest rate method and they are reasonable approximations of their fair value. The fair value of the current trade and other receivables approximate to their book values since the discounting effect due to short maturities is not essential.

Available-for-sale investments include investments in shares and fund units. Listed shares and fund units are measured at fair value, which is the market price at balance sheet date (Level 1). For unlisted shares the fair value cannot be measured reliably, in which case the investments are carried at cost (Level 3).

The derivative financial instruments are initially recognised at fair value on the date when TVO becomes a party to the contract, and a subsequently measured at fair value on the balance sheet date. The fair values are determined using a variety of methods and financial valuation techniques, and assumptions are based on market quotations on the relevant balance sheet date (Level 2). The fair value of the interest rate swaps is the present value of the estimated future cash flows. The forward foreign exchange contracts are measured using the market rates at the balance sheet date. The fair value of the interest rate options is calculated using market rates at the balance sheet date and by using the Black and Scholes option valuation model. The changes in fair value of the interest rate swaps and forward foreign exchange contracts are recognised in equity or profit of loss, depending on whether they are designated as and qualifying for cash flow hedges or not. The changes in fair value of interest rate options that do not qualify for hedge accounting are presented under the income statement.

The book values of the non-current financial liabilities and current interest-bearing liabilities are measured at amortized cost using the effective interest rate method. The book values of the floating interest rate loans are reasonable approximations of their fair value. The fair value of the fixed interest rate loans has been calculated by discounting future cash flows at the appropriate market interest rates prevailing at balance sheet date (premiums excluded), which were 0.4 - 4.0% (2.4 - 3.9%). The book values of the current non-interest-bearing liabilities are reasonable approximations of their fair value.

Pursuant to private placements, TVO has issued USD-, GBP-, SEK- and NOK-denominated fixed or floating rate Senior Unsecured Notes amounting to EUR 273,5 million which have been swapped into EUR floating or fixed rates using cross-currency interest rate swaps. Each transaction as a whole is treated as long-term fixed or floating rate EUR funding respectively in the financial statements.

16 LOANS AND OTHER RECEIVABLES

Loans and other receivables (non-current assets)

| 1 000 € | 2009 | 2008 |
|---|---------|---------|
| Nuclear waste management loan receivables from parent company | 426 817 | 395 498 |
| Nuclear waste management loan receivables from others | 324 083 | 300 277 |
| Loan receivables | 5 596 | 5 115 |
| Total | 756 496 | 700 890 |

According to section 52 of the Nuclear Energy Act, TVO, in exchange for collateral payments, is entitled to receive fixed-term loans from the Finnish State Nuclear Waste Management Fund, the amount which cannot be larger than 75% of the latest confirmed TVO's share in the Finnish State Nuclear Waste Management Fund. The nuclear waste management loan receivables formed by the amount loaned from the Finnish State Nuclear Waste Management Fund, has been further loaned (with the same terms and conditions) to the equity holders of the company and to Fortum Oyj.

There is no credit risk connected to loans and other receivables.

Trade and other receivables (current assets)

| 1 000 € | 2009 | 2008 |
|--|--------|--------|
| Trade receivables from parent company | 32 772 | 25 943 |
| Trade receivables from others | 23 029 | 20 680 |

| Other receivables | 4 968 | 739 |
| Total | 83 931 | 89 119 |

Prepayments and accrued income include prepaid interests, accrued interest income, other accrued income and other prepaid expenses.

During the current or the previous accounting period the Group has not recognised credit losses or impairments for trade or other receivables. The maximum credit loss risk of trade and other receivables corresponds to their book value. On 31 December 2009 the Group had EUR 1,161 (1,411) thousand overdue receivables of which EUR 940 (693) thousand was overdue more than six months. The overdue receivables are not expected to cause the Group credit losses or impairments.

21 EQUITY

The registered share capital of the company according to the Articles of Association is EUR 461,692,000 which was increased by EUR 100,000,000 during the financial year. On 31 December 2008 the share capital of the company was EUR 361,692,000. TVO does not have a maximum or minimum limit for the share capital. The number of the shares on 31 December 2009 was 1,257,280,792. The shares are divided into the three series of shares as follows: A series 680,000,000, B series 542,997,062 and C series 34,283,730 shares. During 2009 the number of the B series shares increased by 94,813,692. All shares have been fully paid. The shares have no nominal price as is stipulated in the Finnish Limited Liability Companies Act.

On 30 March 2009 the Shareholders' Meeting decided on a share issue of 94,813,692 shares according to which the increase in B series share capital for EUR 100,000,000 was paid in November and registered in December 2009.

According to the Articles of Association, TVO delivers electricity to its shareholders on the so-called Mankala principle, i.e. it delivers the electricity produced or procured to its shareholders in proportion to their shareholding in each series. Each of the shareholders of each series is liable for the variable and fixed annual costs that are specified in detail in the Articles of Association. The Company prepares annually a balance sheet divided into series of shares. The balance sheet, which will be presented to the Shareholders' Meeting, specifies the assets, liabilities and equity of the different series of shares.

Share number reconciliations:

| | | S | hare premium | | |

| Total | 1 257 280 792 | 1 162 467 100 |

The following list describes the equity components:

Share premium reserve

The share premium reserve contains the share premiums of the share issues, EUR 232,435 thousand.

Statutory reserve

The statutory reserve consists of EUR 9,948 thousand paid by Imatran Voima Oy, the predecessor of Fortum Power and Heat Oy, in 1979 when it became an equity holder in the company.

Fair value and other reserves

Profits and losses incurred by fair value changes of available-for-sale investments and derivatives used as cash flow hedges are entered in this reserve. The fair changes of derivatives are transferred to the profit/loss statement, when the cash flows they have been hedging have been realised. Fair value changes in available-for-sale investments are transferred to the income statement, when the investments are relinquished or their value diminishes.

Retained earnings

This item contains the earnings from previous financial periods and the profit/loss of the financial year.

| Total | 129 797 | 134 229 |

25 ASSETS AND PROVISION RELATED TO NUCLEAR WASTE MANAGEMENT OBLIGATION

Share in the Finnish State Nuclear Waste Management Fund

Under the Nuclear Energy Act in Finland, TVO has a legal obligation to fully fund the legal liability for nuclear waste including the decommissioning of the power plant through the Finnish State Nuclear Waste Management Fund (=nuclear waste management obligation).

TVO contributes funds to the Finnish State Nuclear Waste Management Fund to cover future obligations based on the legal liability calculated according to the Nuclear Energy Act. The carrying value of the fund in TVO's balance sheet is calculated according to the interpretation in IFRIC 5 "Rights to Interests arising from Decommissioning, Restoration and Environmental Rehabilitation Funds".

Provision related to the nuclear waste management obligation

The provision is related to future obligations for decommissioning of the power plant and management of spent fuel and operating waste. The fair value of the provision is calculated according to IAS 37 based on discounted future cash flows which are based on estimated future expenses. The cost estimate is based on a nuclear waste management plan covering the management of spent nuclear fuel and operating waste and decommissioning of the nuclear power plant. The plan was updated in 2009 and the effect of functional changes like revised timetable has been included in the cash flows.

At the end of the year, the balance sheet contains the following assets and liabilities concerning the nuclear waste management obligation:

| 1 000 € | 2009 | 2008 |
|---|---------|---------|
| The carrying value of TVO's share in the Finnish State Nuclear Waste Management Fund (non-current | | |
| assets) | 633 484 | 599 789 |
| Provision related to nuclear waste management (non-current liabilities) | | |
| Beginning of the year | 599 789 | 568 121 |
| Increase in provision | 15 527 | 17 145 |
| Used provision | -23 897 | -22 616 |
| Changes due to discounting | 42 065 | 37 139 |
| End of the year | 633 484 | 599 788 |
| The discount rate % | 5.2 | 5.2 |

TVO's legal liability and share in the Finnish State Nuclear Waste Management Fund

TVO's legal liability as stated in the Nuclear Energy Act and the company's share in the Finnish State Nuclear Waste Management Fund at the end of year are as follows:

| 1 000 € | 2009 | 2008 |
|--|-----------|-----------|
| Liability for nuclear waste management according to the Nuclear Energy Act | 1 160 700 | 1 137 600 |
| TVO's funding target obligation 2009 (2008) to the Finnish State Nuclear Waste Management Fund | 1 069 800 | 1 001 200 |
| TVO's share in the Finnish State Nuclear Waste Management Fund 31.12.2009 (31.12.2008) | 1 026 180 | 968 551 |
| Difference between the liability and TVO's share of the fund 31.12.2009 (31.12.2008) | 134 520 | 169 049 |

The legal liability calculated according to the Nuclear Energy Act in Finland and decided by the supervising authority (Ministry of Employment and the Economy) is EUR 1,160.7 (1,137.6) million on 31 December 2009 (31 December 2008). The carrying value of the liability in the balance sheet calculated according to IAS 37 is EUR 633.5 (599.8) million on 31 December 2009. The main reason for the difference between the carrying value of the provision and the legal liability is the fact that the legal liability is not discounted to net present value.

TVO's share in the Finnish State Nuclear Waste Management Fund is EUR 1,026.2 (968.6) million on 31 December 2009. The carrying value of the TVO's share in the fund in the balance sheet is EUR 633.5 (599.8) million. The difference is due to the fact that IFRIC 5 limits the carrying amount of TVO's interest in the Finnish State Nuclear Waste Management Fund to the amount of the related liability since TVO does not have control over the Finnish State Nuclear Waste Management Fund.

The difference between the funding target and the share in the Finnish State Nuclear Waste Management Fund at the end of 2009 is due to the annual adjustment of the liability amount and the funding target. The difference is due to timing, as the annual statutory funding target obligation will be paid during the first quarter of the following year. The difference between the legal liability calculated according to the Nuclear Energy Act and TVO's funding target obligation for 2010 is due to the section 46 of the Nuclear Energy Act, the Council of State accepted to periodise the funding target obligation for the years 2008 - 2012. TVO has issued to the State the shareholders' guarantees as security for the unfunded legal liability. The security also covers unexpected events as determined in the Nuclear Energy Act. The guarantees are included in the nuclear waste management obligations; see note 26: Obligations and other commitments.

TVO utilises the right to borrow funds back from the Finnish State Nuclear Waste Management Fund in accordance with the defined rules. The loans are included in the interest-bearing liabilities; see note 23: Interest-bearing liabilities.

26 OBLIGATIONS AND OTHER COMMITMENTS

Operating leases

Group as lessee

Minimum rents to be paid based on non-cancellable lease agreements:

| 1 000 € | 2009 | 2008 |
|--|------|------|
| No later than one year | 237 | 245 |
| Later than one year and no later than five years | 246 | 104 |
| Total | 483 | 349 |

Then rents recognised as expenses during the period are as follows:

| 1 000 € | 2009 | 2008 |
|---------|------|------|
| Rents | 311 | 279 |
| Total | 311 | 279 |

Non-cancellable lease agreements have been made for the office equipment and vehicles.

Pledged promissory notes and financial guarantees

| _1 000 € | 2009 | 2008 |
|---|---------|---------|
| Pledged promissory notes to the Finnish State Nuclear Waste Management Fund | 750 900 | 695 775 |
| Guarantees given by shareholders related to the nuclear waste management obligation | 253 570 | 264 700 |

The company under the nuclear waste management obligation is entitled to borrow an amount equal to 75% of its share in the Finnish State Nuclear Waste Management Fund. TVO has lent the funds borrowed from the fund to its shareholders and has pledged the receivables from the shareholders as collateral for the loan.

The absolute guarantees given by the equity holders of the company are given to cover the unfunded portion of the nuclear waste management obligation and unexpected events as determined in the Nuclear Energy Act.

Investment commitments

Agreement-based commitments regarding the acquisition of property, plant and equipment:

| 1 000 € | 2009 | 2008 |
|-------------|---------|-----------|
| OL1 and OL2 | 69 000 | 89 300 |
| OL3 | 686 000 | 1 174 000 |
| Total | 755 000 | 1 263 300 |

Pending Court Cases and Disputes

In December 2008, TVO was informed by the International Chamber of Commerce (ICC) that the AREVA-Siemens Consortium (the Supplier) had filed a request for arbitration concerning the delay at OL3 and the ensuing costs incurred. The Supplier's monetary claim is approximately EUR 1 billion. About one half of the claimed amount relates to alleged additional cost on account of the delay. The remainder relates to milestone payments pursuant to the OL3 Plant Contract that in TVO's opinion had not yet become payable. TVO has considered and found the claim by the Supplier to be without merit.

In April 2009, TVO submitted to ICC its answer and counterclaim due to the Supplier's request for arbitration filed with ICC in December 2008 concerning the delay at OL3 and the ensuing costs incurred. TVO's counterclaim in money is approximately EUR 1.4 billion.

TVO is also involved in another ICC arbitration proceeding under the ICC rules concerning the costs of a technically resolved issue in connection with the construction work at OL3. The amount is minor in the context of the value of the project.

Arbitration proceedings may continue for several years

No receivables or provisions have been recorded as a result of the arbitration proceedings.

CO₂ emission rights

In principle TVO has, on 31 December, emission rights at least the same amount as the actual annual emissions are. If the actual emissions exceed the amount of the emission rights that TVO possesses, TVO has booked the expense for exceeding emission rights at the market value on 31 December.

| | 2009 | 2008 | | | |
|---|-------------------|---------|-------------------|---------|--|
| | t CO ₂ | 1 000 € | t CO ₂ | 1 000 € | |
| Granted emission rights | 296 281 | | 296 283 | | |
| Total annual emissions from production facilities | 692 466 | | 661 466 | | |
| Possessed emission rights | 695 829 | | 660 731 | | |
| Emission rights sold * | 83 000 | 967 | 100 000 | 2 246 | |
| Emission rights and emission right reductions bought ** | 482 548 | 6 163 | 464 448 | 10 151 | |
| The SWAP trade of emission rights (EUA) and emission right reductions (CER) *** | | | | | |
| Emission rights sold (EUA) | 0 | 0 | 33 000 | 748 | |
| Emission right reductions bought (CER) | 0 | 0 | 33 000 | 524 | |

TVO is, based on the electricity production during 2000 - 2003 of TVO's share in the Meri-Pori coal-fired power plant, entitled to a corresponding share of gratuitous emission rights. TVO is responsible for the amount of emission rights corresponding to its share of the production of the plant.

^{*} The sales of the emission rights are included in turnover.

^{***} The purchases of the emission rights are included in materials and services. The emission rights that TVO possesses on 31 December are included in intangible assets on the balance sheet.

^{***} SWAP-trade means sales of emission rights (EUA) and the concurrent purchase of emission right reductions (CER), which means the exchange of EUA-units to corresponding amount of CER-units.

27 RELATED PARTY

The Group's related parties include parent company Teollisuuden Voima Oyj and its subsidiaries and joint venture. The related parties also include the Board of Directors and the Executive Management including the President and CEO and Deputy CEO.

| Total | 1 664 | 1 904 |

Some of the Executive Management have option to retire at the age of 60, some at the age of 63.

28 EVENTS AFTER THE BALANCE SHEET DATE

No major reportable events or changes have taken place after the end of year in review.

29 FINANCIAL RISK MANAGEMENT

Finance and financial risk management are centrally administered by the finance department of TVO in accordance with the Finance Policy approved by the Board of Directors. TVO's activities expose it to a variety of financial risks: liquidity risk, market risk and credit risk. These do not include the receivables and obligations between the Company and its owners, as the Company operates under the Mankala principle, see note 1: General information on the group.

TVO has two guiding financial principles. Firstly, to ensure TVO's access to adequate liquidity reserves and secondly to reduce volatility in cash flows deriving form short- and mediumterm changes in the financial markets.

In accordance with the Finance Policy of the Company, derivative financial instruments are entered into only with hedging purposes and the aim is that they qualify for hedge accounting under IFRS.

Liquidity risk

Liquidity and refinancing risk is defined as the amount by which earnings and/or cash flows are affected as a result of the Company not being able to secure sufficient financing. In addition to sufficient liquid assets and committed credit lines TVO seeks to diminish the refinancing risk by spreading the dates of maturities of its loans and financing sources as much as possible across different markets.

In accordance with the Finance Policy of TVO, the maturities and refinancing of long-term loans are planned so that not more than 25 per cent of the outstanding loans mature during the next 12 months. The loans borrowed from the Finnish State Nuclear Waste Management Fund, which have been lent further to the shareholders, form an exemption

TVO uses its domestic commercial paper program for short-term funding purposes. There shall always exist committed credit lines with a minimum duration of 12 months for an amount corresponding to the funding needs of the Company for the following 12 months.

In addition to long-term committed credits the Company shall maintain liquid assets at an amount stated in the Finance policy. In accordance with the Finance Policy, bank deposits, certificates of deposits of banks, commercial papers, municipal papers and treasury notes as well as money market funds are used as investments. Investments are mostly for the shortterm (under 12 months).

^{*} Repayments in 2010 are included in current liabilities in the balance sheet.

As of 31 December 2009, TVO had committed credit facilities of EUR 2,217.1 million. The undrawn and available amount of the committed credit facilities amounted to EUR 1,721.7 million. The committed credit facilities matures in 2012. In addition, TVO's B series shareholders are committed to provide a EUR 300 million subordinated shareholder's loan to TVO. The commitment matures in 2013.

^{**} The doubt on the Finnish State Nuclear Waste Management Fund has no actual date of maturity, but is here treated as a five year loan.

^{*} Repayments in 2009 are included in current liabilities in the balance sheet.

As of 31 December 2008, TVO had committed credit facilities of EUR 2,217.1 million. The undrawn and available amount of the committed credit facilities amounted to EUR 1,514.0 million. The committed credit facilities matures in 2012.

Market risk

Currency risk

TVO is exposed to currency risk mainly in connection with its fuel purchases. The currency of purchases of raw uranium, enrichment and coal is frequently USD. Hedging of a currency denominated purchase is commenced, when a fixed term agreement is entered into and the forecasted currency risk becomes highly probable. Both short-term and long-term loans are withdrawn mainly in euros. The capital of loans denominated in other currencies than euros are hedged latest at the date of loan withdrawal.

Currency swaps, forward foreign exchange contracts and options can be used to hedge the currency exposure.

Interest rate risk

Interest-bearing liabilities expose the Company to interest rate risk. The objective of the Company's interest rate risk management to maintain the interest costs at as low level as possible and to diminish the volatility of interest costs. In accordance with the Finance Policy, the duration of the loan portfolio of the Company (including commitments) can fluctuate between 30 and 42 months. At the balance sheet date the duration was 38 (34) months.

The average interest rate duration can be changed with loans with fixed interest rates, interest rate swaps, interest rate forwards as well as with interest rate cap and floor instruments.

Sensitivity to market risks

Sensitivity to market risks arising from financial instruments as required by IFRS 7.

| | 2009 | | 2008 | |
|--|------------------|---------|------------------|---------|
| _1 000 € | Income statement | Equity | Income statement | Equity |
| + 10% change in EUR/USD exchange rate | -950 | -10 820 | | -12 715 |
| - 10% change in EUR/USD exchange rate | 950 | 10 820 | | 12 715 |
| 1% upward parallel shift in interest rates | 2 389 | 24 507 | -3 761 | 41 964 |
| 1% downward parallel shift in interest rates | -3 573 | -24 482 | 201 | -45 180 |

Assumptions:

The change in EUR/USD exchange rate is assumed to be +/- 10%.

The USD-denominated position includes the Forward foreign exchange contracts which are designated as cash flow hedges and recognised in equity and the Forward foreign exchange contracts not qualified as cash flow hedges, affecting the income statement.

The variation in interest rates is assumed to be 1% parallel shift in the interest rate curve.

The interest rate risk position includes the floating interest rate loan receivables, interest-bearing borrowing and the interest rate derivatives.

The income statement is affected by the interest-bearing loan receivables, floating interest rate borrowings and the interest rate derivatives, excluding those interest rate derivatives that are designated as and qualifying for cash hedges, which are recognised in eguity.

^{**} In addition to interest costs financing costs include commitment fees.

^{***} The loan from the Finnish State Nuclear Waste Management Fund has no actual date of maturity, but is here treated as a five year loan.

Credit risk

Credit risk arises from the potential failure of a counterparty to meet its contractual payment obligations. Commercial trade receivables as well as receivables from financial institutions that relate to investments and transactions involving financial instruments expose the Company to credit risk. In addition to money market funds, financial institutions with a long-term credit rating of at least A- (Standard&Poor's) or A3 (Moody's) or A- (Fitch) are accepted as counterparts. In addition, for OTC derivative financial instrument contracts, TVO has in place a master agreement in the form of an ISDA agreement with the counterparts.

Fuel price risk

Power generation of the group requires the use of fuels that are purchased from global markets. The main fuels used by Group are uranium and coal.

TVO purchases the uranium fuel from the global markets. Purchasing comprises four stages: purchases of uranium concentrate, conversion, enrichment and fuel fabrication. TVO uses in each of these stages long-term purchases from different suppliers. Purchase policy is used to guarantee the availability of fuel and to minimise price risk. This includes storage strategy, diversified long-term purchase agreements as well as using a variety of pricing formulas as an attempt to avoid and mitigate, especially, the impact of temporary large uranium price fluctuations

Purchases of coal are made under purchase agreements so that the Company, at a maximum, maintains an inventory corresponding to approximately the amount of coal used in the production in one year.

TVO has not used financial instruments to hedge the price risk exposure.

Capital risk management

TVO's objective when managing capital is to secure sufficient equity and equity-like funding that safeguards the company's diversified sources of funding.

The Group's objective is to have an equity ratio (IFRS) in the long-term at a level of approximately 25%. When calculating the equity ratio, the loan from the Finnish State Nuclear Waste Management Fund and the provision related to nuclear waste management are excluded. The loans from equity holders of the company are treated as equity.

TVO has no financial covenants in its loan agreements. However, according to the terms in some loan agreements, in a situation where TVO's Equity ratio according to IFRS fall below 25%, the company is obligated to offer a repayment of the loan capital.

TEOLLISUUDEN VOIMA OYJ NOTES TO THE FINANCIAL STATEMENTS, 31 DECEMBER 2009

ACCOUNTING PRINCIPLES

1 VALUATION PRINCIPLES

1.1 Non-current assets and their depreciation

Non-current assets have been capitalized at direct acquisition cost including interest costs over the period of construction less planned depreciation and received allowances. Depreciation according to plan is calculated on a straight-line basis according to the estimated useful economic lives.

The depreciation periods are as follows:

OL1 and OL2 nuclear power plant units

| Basic investment | 61 years |
|---|-------------|
| Investments made according to the modernization programme | 21–35 years |
| Automation investments associated with the modernization | 15 years |
| Additional investments | 10 years |
| | |
| TVO's share in the Meri-Pori coal-fired power plant | 25 years |
| Wind power plant | 10 years |
| TVO's share in the Olkiluoto gas turbine power plant | 30 years. |

1.2 Valuation of inventories

Materials and supplies have been valued at direct acquisition cost, coal on the basis of the FIFO principle (first in, first out), nuclear fuel according to calculated fuel consumption, and supply stocks at average acquisition cost. If the replacement value of inventories on 31 December is lower than the original acquisition cost, the difference will not be entered in the books as an expense because the company operates under the so-called Mankala principle (at cost price).

1.3 CO₂ emission rights

Emission rights are booked at historical cost. A current liability is recognised to cover the obligation to return acquired emission rights. If there are not enough emission rights to cover the return obligation, the current liability is booked for the deficit of emission rights at market price. The cost of emission rights is recognised in the income statement within materials and services. The income of the emission rights sold is compensated to the shareholders. Purchased emission rights have been entered in the balance sheet under intangible rights. Gratuitous emission rights are assets not included in the balance sheet.

1.4 Research and development costs

Research and development costs associated with production activity are entered as annual costs for the year in which they were incurred.

1.5 Items denominated in foreign currency

Transactions in foreign currency have been entered at the relevant exchange rate or at the transaction rate for purchase and sale of foreign currency. On the balance sheet date exchange rate differences on foreign currency accounts have been entered in the income statement under financial income and expenses.

1.6 Valuation of financial instruments

1.6.1 Marketable securities

Marketable securities comprise liquid shares in short-term money market funds and certificate of deposits. Marketable securities are valued in the balance sheet at their original acquisition cost. They are included in cash and cash equivalents in the cash flow statements.

1.6.2 Derivative financial instruments

Derivative financial instruments have not been entered on the balance sheet. Their nominal values and market values are presented in the notes to the financial statements.

Interest rate duration of floating rate loans has been prolonged with interest rate swap, cap and floor agreements. Interest costs of these agreements have been entered on accrual basis and shown in net amount under financial income and expenses. The premiums on interest options have been accrued for the period during which the agreements are valid.

Payments of USD denominated inventory acquisitions have been hedged with currency forward contracts. The realized exchange rate differences of derivative financial instruments have been entered to adjust the acquisition cost of inventories.

2 ITEMS RELATED TO NUCLEAR WASTE MANAGEMENT LIABILITY

Nuclear waste management obligation is provided for in the Nuclear Energy Act. The obligation covers all future costs from nuclear waste handling including decommissioning of nuclear power plant units, costs for final disposal of spent nuclear fuel and the risk margin, decommissioning being assumed to start at the end of the year in question

At the beginning of the calendar year, the Ministry of Employment and the Economy confirms the legal liability of the company for nuclear waste management as of the end of the previous calendar year and the funding obligation target for the calendar year.

The company liable for nuclear waste management shall pay its contribution to the Finnish State Nuclear Waste Management Fund so that the company's share in the Fund on 31 March is equal to the company funding obligation target confirmed for the calendar year in question.

The annual contribution to the Finnish State Nuclear Waste Management Fund and costs from nuclear waste management and services are entered as annual expenses. The nuclear waste management fee is based on the company's proposal. If the nuclear waste management fee set by the Finnish State Nuclear Waste Management Fund differs from the amount proposed by the company, the difference is entered in the accounts for the following financial year.

Nuclear waste management liability and the company's share in the Finnish State Nuclear Waste Management Fund are presented in the notes to the financial statements.

The company must supply the Ministry with guarantees to cover for the difference between the legal nuclear waste management liability and the company's share in the Finnish State Nuclear Waste Management Fund as well as for unforeseen expenses in nuclear waste management. Guarantees are presented in the notes to the financial statements.

A company, liable for nuclear waste management, or its shareholders, are entitled to a loan from the Finnish State Nuclear Waste Management Fund corresponding to 75% of the company's share in the Fund. TVO uses the right to borrow back and loans the funds borrowed from the Fund further to its shareholders.

3 PARENT COMPANY

Teollisuuden Voima Oyj is part of the Pohjolan Voima Group. The parent company of the Pohjolan Voima Group is Pohjolan Voima Oy, which is domiciled in Helsinki.

Copies of Pohjolan Voima's consolidated financial statements are available from the headquarters of the Pohjolan Voima Group, Töölönkatu 4, 00100 Helsinki.

| Total | 1 257 280 792 | 1 162 467 100 | 461 692 | 361 692 |

According to the Articles of Association, TVO delivers electricity to its shareholders on the so-called Mankala principle, i.e. it delivers the electricity produced or procured to its shareholders in proportion to their shareholding in each series. Each of the shareholders of each series is liable for the variable and fixed annual costs that are specified in detail in the Articles of Association. The Company prepares annually a balance sheet divided into series of shares. The balance sheet, which will be presented to the Shareholders' Meeting, specifies the assets, liabilities and equity of the different series of shares.

25 CO₂ EMISSION RIGHTS

In principle TVO has, on 31 December, emission rights at least the same amount as the actual annual emissions are. If the actual emissions exceed the amount of the emission rights that company possesses, the company has booked the expense for exceeding emission rights at the market value on 31 December.

| | 2009 | | 2008 | |
|---|-------------------|---------|-------------------|---------|
| | t CO ₂ | 1 000 € | t CO ₂ | 1 000 € |
| Granted emission rights | 296 281 | | 296 283 | |
| Total annual emissions from production facilities | 692 466 | | 661 466 | |
| Possessed emission rights | 695 829 | | 660 731 | |

| The SWAP trade of emission rights (EUA) and emission right reductions (CER) *** | | | | |
| Emission rights sold (EUA) | 0 | 0 | 33 000 | 748 |
| Emission right reductions bought (CER) | 0 | 0 | 33 000 | 524 |

TVO is, based on the electricity production during 2000 - 2003 of TVO's share in the Meri-Pori coal-fired power plant, entitled to a corresponding share of gratuitous emission rights. TVO is responsible for the amount of emission rights corresponding to its share of the production of the plant.

66

^{*}The sales of the emission rights are included in turnover.

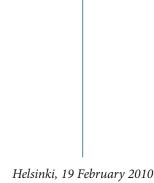

^{**} The purchases of the emission rights are included in materials and services. The emission rights that company possesses on 31 December are included in intangible rights on the balance sheet.

^{***} SWAP-trade means sales of emission rights (EUA) and the concurrent purchase of emission right reductions (CER), which means the exchange of EUA-units to corresponding amount of CER-units.

Proposals to the Annual General Meeting

Teollisuuden Voima Oyj's distributable equity is EUR 9,360,000. The Board of Directors proposes to the Shareholders' Meeting that no dividend shall be paid.

Auditor's Report

We have audited the accounting records, the financial statements, the report of the Board of Directors and the administration of Teollisuuden Voima Oyi for the year ended on 31 December, 2009. The financial statements comprise the consolidated balance sheet, income statement, statement of comprehensive income, statement of changes in total equity, cash flow statement and notes to the consolidated financial statements, as well as the parent company's balance sheet, income statement, cash flow statement and notes to the financial statements.

Responsibility of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the financial statements and the report of the Board of Directors and for the fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, as well as for the fair presentation of the financial statements and the report of the Board of Directors in accordance with laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The Board of Directors is responsible for the appropriate arrangement of the control of the company's accounts and finances, and the Managing Director shall see to it that the accounts of the company are in compliance with the law and that its financial affairs have been arranged in a reliable manner.

Auditor's Responsibility

Our responsibility is to perform an

audit in accordance with good auditing practice in Finland, and to express an opinion on the parent company's financial statements, on the consolidated financial statements and on the report of the Board of Directors based on our audit. Good auditing practice requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements and the report of the Board of Directors are free from material misstatement and whether the members of the Board of Directors of the parent company and the Managing Director have complied with the Limited Liability Companies Act.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements and the report of the Board of Directors. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements and of the report of the Board of Directors, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements and the report of the Board of Directors in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements and the report of the Board of Directors.

The audit was performed in accordance with good auditing practice in Finland. We believe that the audit evidence we have obtained is

sufficient and appropriate to provide a basis for our audit opinion.

Opinion on the Consolidated Financial Statements

In our opinion, the consolidated financial statements give a true and fair view of the financial position, financial performance and cash flows of the group in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Opinion on the Company's Financial Statements and the Report of the Board of Directors

In our opinion, the financial statements and the report of the Board of Directors give a true and fair view of both the consolidated and the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The information in the report of the Board of Directors is consistent with the information in the financial statements.

Other Opinions

We support that the financial statements should be adopted. We support that the Members of the Board of Directors and the Managing Director should be discharged from liability for the financial period audited by us.
