Foreign occupational safety cards accepted by TVO

Foreign occupational safety cards accepted by TVO

Besides the Finnish occupational safety card TVO accepts foreign occupational safety trainings listed below:

Alstom EHS-passport

Westinghouse training

United Kingdom

- Safe Pass Alliance (SPA)
- ECITB/CCNSG Safety Passport Scheme
- Construction Skills Certification Scheme (CSCS)
- Metals Industry Health & Safety Passport
- ACTA Passport
- Vantage – Offshore Passport

Foreign Occupational Safety Cards

The Netherlands

- SCC Basic Elements of Safety
- SCC Safety for operational supervision

Sweden

- SSG ENTRE

Ireland

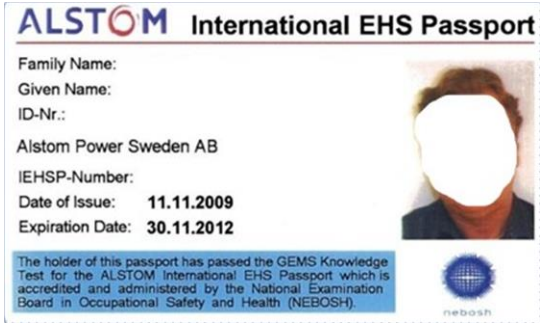
- FAS Safe Pass

USA

- OSHA Outreach Training Program

Alstom EHS- passport

- Alstom international EHS-passport
- Alstom inter-company safety training must be passed to get the passport
- The passport is valid for 3 years
- Pictures from the front- and backside of the passport



Safety Pass Alliance

Safety Pass Alliance

- The Safety Pass Alliance was established in response to the needs identified within the industry and has undertaken to develop and extend the safety passport culture across all interested sectors
- Course delegates are trained over two days. The core session forms the first day of training and it covers the basics of general health and safety good practice. The second day covers sector-specific training.
- The scheme includes the following sector-specific training days:
  - Building Maintenance, Food&Drink, General Manufacturing, Industrial Utilities, Motor Manufacturing, Petrol Retail, Pharmaceutical, Ports & Shipping, Quarries, Underground Railways
- Supervisor course is aimed at those individuals who have either supervisory or managerial role on site

http://www.safetypassalliance.co.uk/

ECITB/CCNSG Safety Passport Scheme

ECITB/CCNSG Safety Passport Scheme

- The aim of the Safety Passport Scheme is to ensure a basic knowledge of health and safety for all site personnel to enable them, after appropriate site induction, to work on site more safely with lower risk to themselves and others
- The two-day training program covers four models:
  - Safe Behavior at Work
  - Safe Place of Work
  - Safe Systems of Work
  - Safety Problems and Safe Solutions

ENGINEERING CONSTRUCTION INDUSTRY TRAINING BOARD

There is an additional day for supervisors, which emphasizes the key role that supervisors have in securing health and safety including safety communications and risk assessments.

Construction Skills Certification Scheme (CSCS) Card

The main aims of the CSCS are:

- To maintain a record of every operative in construction occupations in the UK who achieves a recognized level of competence
- To provide such operatives with a suitable means of identification
- To be available on a voluntary basis to all operatives engaged in construction activities other than for those occupations already covered by their own certification scheme
- Raise standards of health and safety awareness in order to reduce risks and accidents throughout the industry
- www.cscs.uk.com

Metals Industry Health & Safety Passport

The MetSkill safety passport is a certification scheme designed to demonstrate that employees in the metal industry have achieved a basic level of competence in health and safety at work. The MetSkill safety passport scheme provides:

- A basic standard which should be a minimum for all employees
- Evidence that all employees have knowledge and understanding of health and safety, and environmental issues
- Evidence that this knowledge can be applied in the workplace
- Individual certificates which recognizes health and safety competence

www.metskill.co.uk

ACTA Passport

ACTA passport scheme has been developed to ensure that all construction workers at the airport(s) have appropriate and current skills and competencies. The purpose is to maintain a safe environment for employees, suppliers, and visitors to airports, where construction and maintenance is being carried out.

All construction workers working at BAA Airports will be issued with a Passport once they are fully compliant with the BAA standards. This card is linked to a central database that stores a competency profile of each individual.

Vantage – Offshore Passport

The Vantage Offshore System (OPS) was launched in 2001 by the Offshore Petroleum Industry Training Organisation (OPITO) to improve health and safety performance, and manage the movement of personnel within the oil and gas industries. It tracks workers offshore trip durations and their competency and training

SCC Basic Elements of Safety

- Safety, Health and Environment Checklist Contractors (SCC) was primarily developed to ensure for the objective assessment and certification of the safety management systems of contractors providing services to the (petro)chemical industry.
- The Basic Elements of Safety SCC qualification encompasses a basic knowledge of issues such as legislation and regulations, the meaning of ’risk’, prevention, control measures, causes, the recognition of dangerous actions and situations, accident reports, work permits, hazardous chemicals and substances, fire, explosion, confined spaces, tools and machines, hoisting, lifting, carrying, stumbling, slipping, falling, working at heights, welding, electricity, and personal protective equipment.
- www.vca.nl (with document 14,15,16,17,18 or 19)

SCC Safety for operational supervision

- The safety for operational supervision diploma calls for basic knowledge of safety, health and environmental issues and the know-how to use this knowledge in practice to improve the safety of their own and of the persons being supervised
- SOS-SCC emphasizes knowledge of relevant legislations and regulations, ability to recognize hazardous situations and unsafe actions and know-how to avoid them

SSG ENTRE

- ENTRE is common safety training for contractors in the pulp and paper industry
- The ENTRE training is interactive and is performed online
- ENTRE is developed by 34 co-operating mills in the pulp and paper industry
- The purpose of ENTRE is to increase safety in all contract work
- http://entre.ssg.se/

FAS Safe Pass

- The purpose of the FAS Safe Pass Health and Safety Awareness Training Program is to ensure that all construction site and local authority personnel, will have a basic knowledge of health and safety, and be able to work on site without being a risk to themselves or others.
- The Safe Pass Program is aimed at all construction site personnel, including new entrants, to ensure that they have a basic awareness of health and safety.
- http://www.fas.ie/

OSHA Outreach Training Program

- The OSHA Outreach Training Program trains workers in the basics of occupational safety and health.
- Through the program, individuals who complete a one week OSHA trainer course are authorized to teach 10-hour or 30-hour courses in construction or general industry safety and health standards. Authorized trainers can receive OSHA course completion cards for their students.
